The screenshot shows the PC Info application window with the CPU tab selected. The window title is 'PC Info [Beta | Build 2.9.9.900 | x64]'. The CPU tab is highlighted in orange. The table below lists various CPU specifications.

OS	CPU	GPU	RAM	Storage	Optical Devices	Motherboard	Sound Devices	Network	Peripheral	Settings
Name	AMD FX(tm)-8350 Eight-Core Processor									
Number of logical processors	8									
Max frequency	4000 MHz (4.00 GHz)									
Socket	Socket 942									
Status	OK									
L2 cache	8192 KB (8 MB)									
L3 cache	8192 KB (8 MB)									
Architecture	x64-based processor									
Manufacturer	AuthenticAMD									
Current frequency	4000 MHz (4.00 GHz)									
Family	AMD64 Family 21 Model 2 Stepping 0									
Cores	4									
Thread count	8									
Revision	512									
Device ID	CPU0									
Current voltage	13-volt									
Role	CPU									
Processor type	3									
Load	0%									
Level	21									
Part number	To Be Filled By O.E.M.									
Version	Model 2, Stepping 0									

## 10. [FramExtractor - DOWNLOAD](#)

FrameXtractor este un program ce poate extrage frame-urile (cadrele) din filme, clipuri video si le poate salva ca fotografii JPEG la tine in calculator.
